

Topics in Statistics, Machine Learning , Spring 2009

Project Title:

Group Members:

Surname	First Name	Student ID

Your project falls into one of the following categories. Check the boxes which describe your project the best.

1. **New algorithm.** We developed a new algorithm and demonstrated (theoretically and/or empirically) why our technique is better (or worse) than other algorithms. (Note: A negative result does not lose marks, as long as you followed proper theoretical and/or experimental techniques).
2. **Application.** We applied known algorithm(s) to some domain.
 - We applied the algorithm(s) to our own research problem.
 - We used an existing implementation of the algorithm(s).
 - We implemented the algorithm(s) ourself.
 - We tried to reproduce results of someone else's paper.
 - We used an existing implementation of the algorithm(s).
 - We implemented the algorithm(s) ourself.
3. **Survey.** Our project is a survey of a technique (or techniques).
 - We investigated a technique or problem theoretically.
 - We investigated a technique or problem experimentally.
4. **None of the above**
