# Preface

We treat some topics in finite geometry.

# Contents

<b>Preface</b>	<b>iii</b>
<b>1 Examples</b>	<b>1</b>
1.1 Projective Space and Subspaces . . . . .	1
1.2 Affine Spaces . . . . .	4
1.3 Coordinates . . . . .	4
<b>2 Projective and Affine Spaces</b>	<b>7</b>
2.1 Lots of Definitions . . . . .	7
2.2 Axiomatics . . . . .	8
2.3 The Rank Function of a Projective Geometry . . . . .	10
2.4 Duality . . . . .	13
2.5 Affine Geometries . . . . .	14
2.6 Affine Spaces in Projective Space . . . . .	16
2.7 Characterising Affine Spaces by Planes . . . . .	18
<b>3 Collineations and Perspectivities</b>	<b>21</b>
3.1 Collineations of Projective Spaces . . . . .	21
3.2 Perspectivities and Projections . . . . .	23
3.3 Groups of Perspectivities . . . . .	25
3.4 Desarguesian Projective Planes . . . . .	26
3.5 Translation Groups . . . . .	28
3.6 Geometric Partitions . . . . .	30
3.7 The Climax . . . . .	32
<b>4 Spreads and Planes</b>	<b>35</b>
4.1 Spreads . . . . .	35
4.2 Collineations of Translation Planes . . . . .	38
4.3 Some Non-Desarguesian Planes . . . . .	40
4.4 $\text{Alt}(8)$ and $GL(4, 2)$ are Isomorphic . . . . .	41
4.5 Moufang Planes . . . . .	44

<b>5</b>	<b>Varieties</b>	<b>47</b>
5.1	Definitions . . . . .	47
5.2	The Tangent Space . . . . .	49
5.3	Tangent Lines . . . . .	50
5.4	Intersections of Hyperplanes and Hypersurfaces . . . . .	52
<b>6</b>	<b>Conics</b>	<b>55</b>
6.1	The Kinds of Conics . . . . .	55
6.2	Pascal and Pappus . . . . .	56
6.3	Automorphisms of Conics . . . . .	58
6.4	Ovals . . . . .	60
6.5	Segre's Characterisation of Conics . . . . .	61
6.6	$q$ -Arcs . . . . .	64
<b>7</b>	<b>Polarities</b>	<b>67</b>
7.1	Absolute Points . . . . .	67
7.2	Polarities of Projective Planes . . . . .	68
7.3	Polarities of Projective Spaces . . . . .	70
7.4	Polar Spaces . . . . .	72
7.5	Quadratic Spaces and Polarities . . . . .	73
