

MATH 249, WINTER 2017, ASSIGNMENT 0

This is assignment 0. It is not worth any points in the course, but is a chance for you to make sure that you understand how to upload things to crowdmark. On crowdmark you will get a grade out of 4 indicating whether you have done it correctly or partially correctly, but this grade will have no effect on your overall grade. However, if you do not try assignment 0, I will not be very sympathetic to technical problems with submitting later.

This assignment is due Friday January 6 at 3pm. It should be submitted using crowdmark.

Crowdmark instructions.

- You will have received an email from crowdmark giving you a link where you can submit – don't use someone else's link as that will replace their assignment with yours and submit nothing for you.
- You will receive 0 if the image quality for your assignment is not adequate. Check after uploading to see if it is clear. If in doubt use a computer lab scanner. It is possible to get an adequate quality image from most cell phone cameras but it is not always easy – this is one of the biggest causes of problems.

Questions.

- (1) What part of mathematics do you like the best at this stage of your life?
- (2) Read the course outline (on LEARN) and tell me how many times the word “academic” appears on p2. Include a sentence or two explaining any choices you made in coming up with your answer.
