

Assignment 2

Translate each of the following four syllogisms into equational arguments.

<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">(1) All M is P.</td> <td style="width: 50%; text-align: right;">= 0</td> </tr> <tr> <td style="border-bottom: 1px solid black;">All S is M.</td> <td style="text-align: right; border-bottom: 1px solid black;">= 0</td> </tr> <tr> <td>All S is P.</td> <td style="text-align: right;">= 0</td> </tr> </table>	(1) All M is P.	= 0	All S is M.	= 0	All S is P.	= 0		<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">(2) All M is P.</td> <td style="width: 50%; text-align: right;">= 0</td> </tr> <tr> <td style="border-bottom: 1px solid black;">No S is M.</td> <td style="text-align: right; border-bottom: 1px solid black;">= 0</td> </tr> <tr> <td>No S is P.</td> <td style="text-align: right;">= 0</td> </tr> </table>	(2) All M is P.	= 0	No S is M.	= 0	No S is P.	= 0
(1) All M is P.	= 0													
All S is M.	= 0													
All S is P.	= 0													
(2) All M is P.	= 0													
No S is M.	= 0													
No S is P.	= 0													

<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">(3) All P is M.</td> <td style="width: 50%; text-align: right;">= 0</td> </tr> <tr> <td style="border-bottom: 1px solid black;">No M is S.</td> <td style="text-align: right; border-bottom: 1px solid black;">= 0</td> </tr> <tr> <td>No S is P.</td> <td style="text-align: right;">= 0</td> </tr> </table>	(3) All P is M.	= 0	No M is S.	= 0	No S is P.	= 0		<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%;">(4) No M is P.</td> <td style="width: 50%; text-align: right;">= 0</td> </tr> <tr> <td style="border-bottom: 1px solid black;">All S is M.</td> <td style="text-align: right; border-bottom: 1px solid black;">= 0</td> </tr> <tr> <td>No S is P.</td> <td style="text-align: right;">= 0</td> </tr> </table>	(4) No M is P.	= 0	All S is M.	= 0	No S is P.	= 0
(3) All P is M.	= 0													
No M is S.	= 0													
No S is P.	= 0													
(4) No M is P.	= 0													
All S is M.	= 0													
No S is P.	= 0													

Which of the six diagrams above could qualify as **Venn diagrams**?

Answer: _____

The Expansion Theorem

For the formula $F(A, B) = (AB)'$ carry out the following computations to calculate the expansion of $F(A, B)$ on A, B :

	Full Expression	Value
$F(1, 1) =$	$=$	$=$
$F(1, 0) =$	$=$	$=$
$F(0, 1) =$	$=$	$=$
$F(0, 0) =$	$=$	$=$

Thus expanding on A, B gives: $F(A, B) =$ _____

For the formula $F(A, B, C) = (AB)' \cup (BC)$ carry out the following computations to calculate the expansion of $F(A, B, C)$ on A :

	Full Expression	Simplified
$F(1, B, C) =$		$=$
$F(0, B, C) =$		$=$

Expanding on A gives: $F(A, B, C) =$ _____

For the formula $F(A, B, C) = (AB)' \cup (BC)$ carry out the following computations to calculate the expansion of $F(A, B, C)$ on B, C :

	Full Expression	Simplified
$F(A, 1, 1) =$		$=$
$F(A, 1, 0) =$		$=$
$F(A, 0, 1) =$		$=$
$F(A, 0, 0) =$		$=$

Expanding on B, C gives: $F(A, B, C) =$ _____

Elimination

For the formula $E(A, B, C) = (A(A' \cup B)'C)'$ carry out the following computations to eliminate A from the equation $E(A, B, C) = 0$:

	Full Expression	Simplified
$E(1, B, C) =$		$=$
$E(0, B, C) =$		$=$

Eliminating A gives (simplify first!): _____ $= 0$
