

Part 8

AN INTRODUCTION TO SURVEY SAMPLING

- Why sample?
- Survey sampling:
 - Sample survey design;
 - Non-sample errors:
 - The frame;
 - Non-response;
 - The measuring instrument;
 - Sample survey execution;
 - Assessing sample survey reports;
 - Criteria for good sample surveys.
- Probability selecting:
 - Equiprobable selecting:
 - Stratifying the population;
 - Clustering.
 - Survey sampling theory:
 - Confidence intervals:
 - Averages;
 - Totals;
 - Proportions;
 - Frequencies.

Part 8 Table of Contents

- Figure 8.1. SURVEY SAMPLING: An Introduction.
- Figure 8.2. SURVEY SAMPLING: Introductory Illustrations.
- †Figure 8.3. PLANNED DATA COLLECTION: Experiments and Samples.
- Figure 8.4. SAMPLE SURVEY DESIGN/EXECUTION: Introductory Illustrations.
- Figure 8.5. SAMPLE SURVEY DESIGN/EXECUTION: Non-Sample Errors in Sample Surveys.
- Figure 8.6. SAMPLE SURVEY DESIGN/EXECUTION: Selecting from Imperfect Frames.
- Figure 8.7. SAMPLE SURVEY DESIGN/EXECUTION: An Introduction to Non-Response.
- Figure 8.8. SAMPLE SURVEY DESIGN/EXECUTION: Measuring with Questionnaires.
- Figure 8.9. SAMPLE SURVEY DESIGN/EXECUTION: Canadian Census Data Gathering.
- †Figure 8.10. PLANNED DATA COLLECTION: Sampling and Sampling Distributions.
- Figure 8.11. UNSTRATIFIED POPULATIONS: Estimating an Average or a Total.
- Figure 8.12. EQUIPROBABLE SELECTING: Diagrammatic Illustrations.
- Figure 8.13. SURVEY SAMPLING: Opinion Polling – An Introduction.
- Figure 8.14. SURVEY SAMPLING: One Assessment of Polling.
- Figure 8.15. SURVEY SAMPLING: Poll Answers as Misinformation.
- Figure 8.16. SURVEY SAMPLING: Polls and Television Ratings.
- Figure 8.17. UNSTRATIFIED POPULATIONS: Estimating a Proportion or a Frequency.
- Figure 8.18. SURVEY SAMPLING: Case Study – Coffee and Sex.
