Lectures

No in-person lectures will be held during the last two weeks of the term (Mar. 24 — Apr. 3). I have posted lecture notes for these lectures on the Learn page for the course, under "Content". If I am able to put together some form of pre-recorded lectures, these will also be posted there.

No make-up lectures will be held for the ones we have missed.

All other information for the course will be posted on the original (this) course webpage.

Office hours

I will maintain the current office hours, i.e., Tuesdays, 2:30 — 4:00 pm until the last course activity. If this time does not work for you, please suggest alternative times by email.

I will be conducting office hours online, using Zoom:
https://us04web.zoom.us/j/700651291
Please sign on during the regular office hours or at a pre-arranged time.

Assignment 3

Assignment 3 will be posted before Tue., Mar. 24. The due date will remain the same: Fri., Apr. 3, 2020.

Evaluation of graduate students

The assessments and grading scheme remain the same as planned originally.

Evaluation of undergraduate students

We will not have a final exam. Instead, we will have a project similar to the one for the graduate students. The weightage for the course grade will be: assignments 45%, midterm exam 30%, project 25%.

Projects

Please see the course website for what a project entails.

I will post suggestions for projects shortly. If you have an idea of a topic / paper aligned with the theme of the course, please discuss this with me.
I will schedule two time slots for the project presentations, one for undergraduate students, and one for graduate students. UG students are expected to attend the presentations for their UG classmates, and similarly graduate students are expected to attend the presentations for their graduate classmates.

If you are registered, and have not given me your constraints, or would like to update them, please do so by the end of the day, Thu., Mar. 26, 2020.
