

This letter is in support of the four month visit, Dec. 2022 to April, 2023, of Phd student David Torregrosal. The visit is for research work in Continuous Optimization with Walaa Moursi and Henry Wolkowicz, in Dept. of Comb. and Opt.

David is a student of Francisco Javier Aragon Artacho, Department of Mathematics, University of Alicante, Spain. ([sites.google.com/site/franaragon/home](https://sites.google.com/site/franaragon/home)) Francisco is an international well known young researcher who already has an excellent well established research record [www.dropbox.com/s/llspwquh3q4vn9n/CV](https://www.dropbox.com/s/llspwquh3q4vn9n/CV) His research overlaps that of both Walla and Henry in modern optimization algorithms as well as stability analysis.

We (Walla and Henry) are certain of a mutually beneficial visit for us and our research group.

Yours Sincerely,  
Prof. Walaa Moursi and Henry  
Wolkowicz

Professor Henry Wolkowicz
