Personal Data

Degrees

Ph.D. in Algorithms, Combinatorics, and Optimization   1998–2003
Carnegie Mellon University, Pittsburgh, USA
Dissertation title: *Approximation Algorithms for Minimum-Cost Low-Degree Subgraphs*
Thesis advisor: Prof. R. Ravi

M.Sc. in Computer Science   1993–98
University of Saarbrücken, Saarbrücken, Germany
Thesis title: *Fast Combinatorial Algorithms for Packing and Covering Problems*
Thesis advisors: Prof. Naveen Garg, Prof. K. Mehlhorn

Employment

University of Waterloo, Waterloo, Canada   2013 – present
Department of Combinatorics & Optimization
Professor

Amazon Inc., Canada   2019 – 2025
GDS-Modeling and Optimiation
Scholar and Principal Scientist

University of Waterloo, Waterloo, Canada   2008–13
Department of Combinatorics & Optimization
Associate Professor

University of Waterloo, Waterloo, Canada   2003–08
Department of Combinatorics & Optimization
Assistant Professor

Università di Roma "La Sapienza", Rome, Italy   2003–04
Dipartimento di Informatica e Sistemistica
Visiting Researcher

AT&T Research, Florham Park, USA   2001
Internship

Lucent Technologies (Bell Laboratories), Murray Hill, USA   2000
Internship

Awards and Honours

Best Paper Award   2024
FICO Xpress (Runner Up)

Best Paper Award   2020
Symposium on Algorithmic Game Theory

Discovery Accelerator Supplement 2012
Natural Sciences and Engineering Research Council of Canada

Outstanding Performance Award 2006,2008,2012,2015
University of Waterloo, Waterloo, Canada

Early Research Award 2007–12
Ministry of Research & Innovation, Ontario, Canada

Gambrinus Fellowship 2007
Universität Dortmund, Dortmund, Germany

IBM Corporation Faculty Award 2005
IBM Corp., Yorktown Heights, USA

William Larimer Mellon Fellowship 1998–2001
Carnegie Mellon University, Pittsburgh, USA

Research and Scholarship

Areas of Interest

Combinatorial Optimization, Approximation Algorithms, Graph and Network Algorithms, Algorithmic Game Theory, Efficient Implementations

Publications

Invited Lectures (since 2010)

Jul, 2024 *Dynamic Discretization Discovery for Region-Based Networks.* Invited Talk at International Symposium for Mathematical Programming

May, 2023 *Faster Solutions of Very Large Timing Optiumization Problems Using Dynamic Discretization Discovery.* Invited Talk at SIAM Conference on Optimization

Sep, 2021 *Size Reduction Techniques for Timing Aware Network Models.* Invited Talk at Informs Annual Meeting

Jan, 2019 Approximate Network Design via Mathematical Programming. *Invited Talk at Amazon Research, Seattle, USA*

Jan, 2019 *Matching Games: From Bargaining to the Nucleolus.* Invited plenary talk at Aussois Combinatorial Optimization Workshop, Aussois, France

July, 2018 Improved Approximation for Tree Augmentation via Chvatal Gomory Cuts. *Invited talk at 23rd International Symposium on Mathematical Programming, Bordeaux, France*

May, 2018 *Improved Approximation for Tree Augmentation via Chvatal Gomory Cuts.* Invited talk at 9th Workshop for Flexible Network Design, University of Maryland, Maryland, USA

June, 2017 Improved Approximation for Tree Augmentation via Chvatal Gomory Cuts. *Invited plenary talk at 13th Workshop on Models and Algorithms for Planning and Scheduling Problems, Seeon-Seebruck, Germany*

July, 2016 *Aproximate Price Collecting Network Design.* Invited plenary talk Symposium for Discrete Mathematics, Berlin, Germany

May, 2016 *Network Bargaining – Where Bargaining & Matching Theory Meet. Invited main talk at Lond School of Economics, London, United Kingdom*

Apr, 2016 *Approximate Deadline Scheduling with Precedence Constraints. Invited main talk at Colloquium of Research Area KL "Algorithms & Complexity" of the Hausdorff Center for Mathematics, Bonn, Germany*

Mar, 2016 *Network Bargaining – Where Bargaining & Matching Theory Meet. Invited talk in CWI, Amsterdam, The Netherlands*

Jan, 2016 *Network Bargaining – Where Bargaining & Matching Theory Meet. Invited talk in Graduate Colloqium at TU Berlin, Germany*

Nov, 2015 *Aproximate Price Collecting Network Design. Talk at the Hausdorff Institute, Bonn, Germany*

Sep, 2015 *Approximate Deadline Scheduling with Precedence Constraints. Invited Talk at workshop "Efficient algorithms in game theory, optimization and data science", Aachen, Germany*

Sep, 2015 *Approximate Deadline Scheduling with Precedence Constraints. Invited Talk at ESA'15, Patras, Greece*

Sep, 2015 *Recent News for an old Steiner Tree Formulation. Invited* **Plenary Talk** *at Algo'15 Meeting, Patras, Greece*

Jul, 2015 Approximate Deadline Scheduling with Precedence Constraints. *Invited Talk at ISMP'15, Pittsburgh, Greece*

Sep, 2015 *Recent News for an old Steiner Tree Formulation. Invited Talk at University of Michigan, Michigan, USA*

Apr, 2015 *Approximate Deadline Scheduling with Precedence Constraints. Invited Talk at workshop "Discrepancy and Modern Roundings", Holetown, Barbados*

Apr, 2013 Diffusion and Node-Weighted Steiner Trees. *Talk at University of Maryland, Maryland, USA*

Apr, 2013 Diffusion and Node-Weighted Steiner Trees. *Talk at Workshop on Combinatorial Optimization, Bellairs Research Centre, Barbados.*

Apr, 2012   Stabilizing Unstable Instances of Network Bargaining. *Talk at Workshop on Algorithmic Game Theory, Bellairs Research Centre, Barbados.*

Jan, 2012   Structured Set-Cover via Geometric Sampling. *Talk at Technical University Berlin, Berlin, Germany.*

Nov, 2011   Structured Set-Cover via Geometric Sampling. *Talk at Workshop on Approximation Algorithms, Banff Research Centre, Banff, Canada.*

Oct, 2011   LP Relaxations for Steiner Trees. *Talk at McMaster University, Hamilton, Canada.*

Mar, 2011   LP Relaxations for Steiner Trees. *Talk at University of Miami, Miami, USA.*

Jul, 2010   LP Relaxations for Steiner Trees. *Talk at ETH, Zurich, Switzerland.*

Jun, 2010   Approximating Prize-Collecting Steiner Forests. *Talk at EPFL, Lausanne, Switzerland.*

Feb, 2010   On Column Restricted and Priority Integer Covering Programs. *Talk at University of Alberta, Edmonton, Canada.*

Grant Record

Grants held as a principal investigator

Efficient Algorithms for Comb. Opt. Problems in Networks and Beyond CAD 210000 Discovery Grant, NSERC	2017–26
Flexible and Effective Techniques for the Design of Approximation Algorithms CAD 210000 Discovery Grant + CAD 120000 Accelerator Supplement, NSERC	2012–17
Algorithmic Game Theory and Approximate Network Design CAD 140000, Early Researcher Award, Province of Ontario	2007–12
Algorithmic Game Theory and Approximate Network Design CAD 125000, Discovery Grant, NSERC	2007–11
Gambrinus Fellowship EUR 5000, Universität Dortmund, Germany	2007
Approximation Algorithms and Algorithmic Game Theory USD 20000, IBM Corporation Faculty Award, IBM Corp	2005
Approximation Algorithms for Constrained Network Design Problems CAD 60000, Discovery Grant, NSERC	2004–06

Other grants

Infrastructure Grant for Mathematical Excellence CAD 630000, New Opportunities Award, held as one of eleven principal researchers, CFI	2004-08
Infrastructure Grant for Mathematical Excellence CAD 630000, matching funds for above grant, Ontario Research Fund	2004-08

Teaching Activities

Courses taught

Introduction to Combinatorics (Math 239) Number of students: 64	S12

Introduction to Optimization (CO 250)   F11,S12,W13,S14,W15,F24
Number of students: 97 (F11), 184 (S12), 104 (W13), 111 (S14), 77 (W15), 116 (F24)

Introduction to Optimization Online (CO 250 Online)   W15
Number of students: 68

Network Flows (CO 351)   W07,S08
Number of students: 55 (W07), 33 (S08)

Deterministic OR Models (CO 370)   W07,F12,W20
Number of students: 21 (W07), 70 (F12), 110 (W20)

Game Theory (CO 456)   F09,F14
Number of students: 42 (F09), 56 (F14)

Combinatorial Optimization (CO 450/650)   F08,F09,F10
Number of students: 18 (F08), 27 (F09), 8 (F10)

Algorithmic Game Theory (CO 759)   F12, F16, F18
Number of students: 14 (F12), 56 (F14), 80 (F18)

Sel. Topics in CO: Modern Roundings in Approximation Algorithms   S16
(University of Bonn, Germany) Number of students: 10

Thesis supervision

Madison Van Dyk   S20–S24
Ph.D., C&O
Thesis Title: *Routing, Scheduling, and Sorting in Consolidated Networks*

Mathieu Rundstrom   F20–S24
M.Math, C&O
Thesis Title: *Two combinatorial problems from craniosynostosis.*

Hao Sun   F16–S22
Ph.D., C&O
Thesis Title: *Hitting Weighted Even Cycles in Planar Graphs*

Marina Drygala   F19–F20
M.Math, C&O
Thesis Title: *Craniosynostosis Surgery: A Study of Rearrangement*

Ishan Bansal   F19–S20
M.Math, C&O
Thesis Title: *The Merge Algorithm for Capacitated Network Design*

Justin Toth   F15–S21
M.Math, C&O
Theis Title: *Computing the Nucleolus of Matching and b-Matching Games*

Natig Tofigzadeh   F18–S20
M.Math, C&O
Thesis Title: *An Algorithm for Stable Matching with Approximation up to the Integrality Gap*

Sina Rezazadeh   S16–W17
Ph.D., C&O

Linda Farczadi   S12–S15
Ph.D., C&O
Thesis Title: *Matchings and Games on Networks*

Isaac Fung S11–F15
Ph.D., C&O

Mohammad Shadravan S12–S14
M.Math, C&O
Thesis Title: *On the Integrality Gap of Directed Steiner Tree Problem*

Sina Sadeghian S12–S13
M.Math, C&O, joint with L. Sanità
Thesis Title: *Node-Weighted Prize Collecting Steiner Tree and Applications*

Devanshu Pandey F11–W13
M.Math, C&O
Thesis title: *Vehicle Routing: A Survey of Approximation Algorithm Techniques*

Malcolm Sharpe W11–S12
M.Math, C&O

Elyot Grant F10–S11
M.Math, C&O, joint with T. Chan
Thesis title: *Covering Problems via Structural Approaches*

David Steiner F09–W12
M.Math (CS), joint with K. Larson
Thesis title: *Network Bargaining: Creating Stability using Blocking Sets*

Marcus Sheah F08–W10
M.Math, C&O
Thesis title: *Iterative Rounding Approximation Algorithms in Network Design*

James Pearson S08–W09
M.Math, C&O
Thesis title: *Exact, Approximate, and Online Algorithms for Optimiza-tion Problems Arising in DVD Assignment*

David Pritchard F06–W09
Ph.D., C&O, joint with L. Tuncel
Thesis title: *Linear Programming Tools and Approximation Algorithms for Combinatorial Optimization*

Patrick Roh F05–F06
M.Math, C&O
Thesis title: *Minimum Crossing Problems on Graphs*

Kunlun Tan F04–W06
M.Math, C&O
Thesis title: *On the Role of Partition Inequalities in Classical Algorithms for Steiner Problems in Graphs*

David Wheatley S06–S07
M.Math, C&O
Thesis title: *Crossmonotonic Cost-Sharing Methods for Network Design Games*

Other student supervision

Haripriya Pulyassary S20
Undergraduate Research Assistant, C&O
Project: *Algorithms for generalized multicommodity flows over time*

Madison van Dyk <div style="float:right">F18</div>

Undergraduate Research Assistant, C&O
Project: *Improved Approximations for Precedence-Constrained Deadline Scheduling*

Simon Huang <div style="float:right">S18</div>

Undergraduate Research Assistant, C&O
Project: *Improved Approximation Algorithms for Tree Augmentation in Bounded Compressed Height Instances*

Erlang Wiratama Surya <div style="float:right">S18</div>

Undergraduate Research Assistant, C&O
Project: *Improved Approximation Algorithms for Tree Augmentation in Bounded Compressed Height Instances*

Deon Nicholas <div style="float:right">W15</div>

Undergrad Research Assistant
Project: *Optimization in Cranofacial Surgery – Joint with Sick Kids, Toronto*

Jason Lin <div style="float:right">S14</div>

Undergrad Research Assistant
Project: *Directed Multicuts in Planar Graphs*

Alexander Remorov <div style="float:right">S11</div>

Undergrad Research Assistant, joint with L. Tuncel
Project: *Combinatorial Algorithms for solving Convex Programs*

Elyot Grant <div style="float:right">S09</div>

Undergrad Research Assistant
Project: *Approximating Capacitated Covering Problems*

James Pearson <div style="float:right">S08</div>

Undergrad Research Assistant
Project: *Optimization Problems in the Mail-Order DVD Rental Industry*

Jonathan Dietrich <div style="float:right">S05</div>

Undergraduate Research Assistant
Project: *On the Integrality Gap of an LP Relaxation for the VPN Problem*

Maurice Cheung <div style="float:right">S06</div>

Undergraduate Research Assistant
Project: *Efficient Implementation of a Fast Packing LP Solver*

Siddharth Rajaram <div style="float:right">F06–S07</div>

M.Math (essay), C&O
Essay title: *The Lifted-Cut Relaxation of the Steiner Forest Problem*

Thesis examination

Vishnu Narayan <div style="float:right">W17</div>

M.Math (C&O), University of Waterloo
Thesis title: *Approximating Minimum-Size 2-Edge-Connected and 2-Vertex-Connected Spanning Subgraphs*

Vinayak Pathak <div style="float:right">W15</div>

Ph.D. (CS), University of Waterloo
Thesis title: *Reconfiguring Triangulations*

Shahin Kamali F14
Ph.D. (CS), University of Waterloo
Thesis title: *Alternative Measures for Finer Analysis of Bin Packing, List Update, and Other Online Problems*

Bundit Laekhanukit S14
Ph.D. (CS), McGill University
Thesis Title: *Inapproximability of Combinatorial Problems in Subexponential Time*

Hadi Minnoei S13
Ph.D. (C&O), University of Waterloo
Thesis Title:*Mechanism Design for Covering Problems*

Nima Mousavi S13
Ph.D. (ECE), University of Waterloo
Thesis title:*Algorithmic Problems in Access Control*

Narges Simjour S13
Ph.D. (CS), University of Waterloo
Thesis title: *Parameterized Enumeration of Neighbour Strings and Kemeny Aggregations*

Babak Behsaz F12
Ph.D. (CS), University of Alberta, Edmonton
Thesis title: *Approximation Algorithms for Clustering Problems*

Beth-Ann Austin S11
M.Math (C&O), University of Waterloo
Thesis title: 2-*Crossing Critical Graphs with a* $V8$ *Minor*

Isabel Urrutia-Schroeder S11
M.Math (C&O), University of Waterloo
Thesis title: *Finding* 3-*Connected* 2-*Crossing-Critical Graphs with* $V8$ *Minors and no* $V10$ *Minors.*

Shubham Gupta S11
M.Math (C&O), University of Waterloo
Thesis title: *Building Networks in Uncertainty*

Andy Curtis F11–W12
Ph.D. (CS), University of Waterloo
Thesis title: *Reducing the Cost of Operating a Datacenter Network*

Nicolas Sonnerat S10
Ph.D. (Math), McGill University
Thesis title: *Galaxy Cutsets and Graph Connectivity: Variations on a Theme*

Weibei Li S10
M.Math (Computational Math), University of Waterloo
Thesis title: *The Prize-collecting Steiner Tree Problem and Underground Mine Planning*

Bundit Laekhanukit S10
M.Math (C&O), University of Waterloo
Thesis title: *Approximation Algorithms for* (S, T)-*Connectivity Problems*

Peruvemba Ravi S10
M.Math (Math), University of Waterloo
Thesis title: *A Study of Worst-Case Performance Bounds for Fast and Simple Approximation Algorithms for the Minimization of Makespan of Flowtime-Optimal Schedules in the Basic Parallel Identical Machine Model*

Piyashat Sripratak W10
M.Math (C&O), University of Waterloo
Thesis title: *On the Number of Edges in a Quasi-planar Graph*

Aaron Dos Remedios W10
M.Math (C&O), University of Waterloo
Thesis title: *Approximation Algorithms For Multi-Unit Online Auctions With Unknown Supply*

Jane Gao W09
Ph.D. (C&O), University of Waterloo
Thesis title: *Generation and Properties of Random Graphs and Analysis of Randomized Algorithms*

Wai-Shing Fung S09
M.Sc., Chinese University of Hong Kong
Thesis title: *Degree Bounded Vertex Connectivity Network Design with Metric Cost*

Mina Razaghpour F08
M.CS, University of Waterloo
Thesis title: *The Steiner Ratio for the Obstacle-Avoiding Steiner Tree Problem*

Ashkan Aazami F07–F08
Ph.D. (C&O), University of Waterloo
Thesis title: *Hardness Results and Approximation Algorithms for some Problems on Graphs*

Ehsan Chiniforooshan F07
Ph.D. (CS), University of Waterloo
Thesis title: *Intersperse Coloring*

Narges Simjour S06
M.Math. (CS), University of Waterloo
Thesis title: *A Different Optimality Measure for the d-Domatic Number Problem*

Michael J. Spriggs F06
Ph.D. (CS), University of Waterloo
Thesis title: *Morphing Parallel Graph Drawings*

Member of Program Committee

Hausdorff Trimester on Combinatorial Optimization 2015
Co-Organizer

International Symposium on Algorithmic Game Theory (SAGT) 2015
Member of Program Committee

International Symposium on Mathematical Programming (ISMP) Session Organizer	2015
ACM EC Member of program committee	2014
International Workshop on Approximation Algorithms for Combinatorial Optimization Problems (APPROX) Member of Program Committee	2014
Symposium on Theory of Computing (STOC) Member of program committee	2014
Symposium on Discrete Algorithms (SODA) Member of program committee	2014
Workshop on Flexible Network Design Co-Organizer	2013
Conference on Web and Internet Economics (WINE) Member of program committee	2013
International Symposium on Algorithmic Game Theory (SAGT) Member of program committee	2013
International Symposium on Mathematical Programming (ISMP) Cluster Chair (Combinatorial Optimization)	2012
International Workshop on Approximation Algorithms for Combinatorial Optimization Problems (APPROX) Member of Program Committee	2012
International Symposium on Combinatorial Optimization (ISCO) Member of Program Committee	2012
European Symposium on Algorithms (ESA) Member of Program Committee	2012
Workshop on Approximation and Online Algorithms (WAOA) Member of Program Committee	2011
Workshop on Approximation and Online Algorithms (WAOA) Member of Program Committee	2010
CORS-INFORMS Annual Meeting Session Chair	2010
Workshop on Approximation and Online Algorithms, Zurich, Switzerland Member of program committee	2006
European Symposium on Algorithms, Mallorca, Spain Member of program committee	2005
Workshop on Comb. & Alg. Aspects of Networking, Waterloo, Canada Member of program committee	2005

Refereeing and reviewing

Journals

Since 2003, I have on average reviewed 5 papers per year for ACM Transactions on Algorithms, Algorithmica, Discrete and Applied Mathematics, Information Processing Letters, Journal of Discrete

Algorithms, Journal of Graph Algorithms and Applications, Journal of the ACM, Mathematical Programming, SIAM Journal on Computing, SIAM Journal on Discrete Mathematics, Operations Research, Operations Research Letters, and Theoretical Computer Science.

Conferences

Since 2003, I have on average reviewed 5–10 papers per year for ACM Symposium on the Theory of Computing (STOC), ACM-SIAM Symposium on Discrete Algorithms (SODA), ACM Symposium on Principles of Distributed Computing (PODC), Conference on Integer Programming and Combinatorial Optimization (IPCO), European Symposium on Algorithms (ESA), IEEE Symposium on Foundations of Computer Science (FOCS), International Colloquium on Automata, Languages and Programming (ICALP), Workshop on Comb. & Alg. Aspects of Networking (ISAAC), International Workshop on Approximation Algorithms for Combinatorial Optimization Problems (APPROX), Foundations of Software Technology and Theoretical Computer Science (FSTTCS), Latin American Theoretical Informatics (LATIN), Workshop on Approximation and Online Algorithms (WAOA), Workshop on Comb. & Alg. Aspects of Networking (CAAN), Symposium on Theoretical Aspects of Computer Science (STACS), Scandinavian Workshop on Algorithm Theory (SWAT). This count does not include papers refereed during program committee memberships.

Consulting

Correcting Cranofacial Deformations   2011–2015, 2018–22
SickKids Hospital, Toronto, Canada

Optimization Issues in the DVD Rental Industry   2009–10
Zip.Ca, Ottawa, Canada

Scheduling automated stacker cranes   2006
Hutchinson, Hong Kong, China
