

ABOUT THE FINAL EXAM

CO 430/630 WINTER 2026

The final exam will take place in the registrar-scheduled time slot, which is **Thursday, April 16, 2026 from 7:30pm to 10:00pm in MC 4064.**

It will be a typical closed-book, written exam, though you will have some choice in which questions you do. It will cover the whole course, but since we already had a midterm on the material from the beginning of the course, it will be roughly twice as much on the material since the midterm compared to the material before the midterm. **Anything we discussed in class or that was on an assignment is fair game for the final as is the material from the non-intersecting path worksheet.** The other worksheets are good practice with course material but you are not expected to know the new things developed on them for the exam.

If you have any questions about the final exam don't hesitate to ask me, by email, or on discord, or in office hours.

My office hours leading up to the final will be

- Monday April 6, 3pm to 5pm
- Monday April 13, 3pm to 5pm
- Wednesday April 15, 1:30pm to 3pm

in MC 5126.
