

## CO 430/630 LECTURE 11 SUMMARY

WINTER 2026

### SUMMARY

You worked on worksheets. There were two, one on species over species and one on averages (which wasn't quite what I thought it was going to be). Some groups started with one of them and some with the other.

### NEXT TIME

We'll continue the worksheets next time.

### REFERENCES

There's not really a clear reference for these, but perhaps Kevin's past videos could be helpful <https://www.math.uwaterloo.ca/~kpurbhoo/winter2021-co630/co630-videos.html>.
